

#### HOMESITE IDENTIFICATION MARKERS ARC RULES AND REGULATIONS

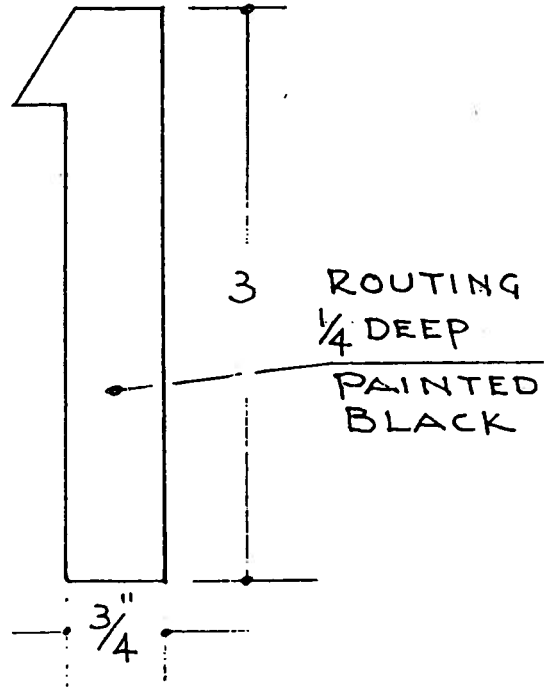

4.2.26 HOMESITE IDENTIFICATION MARKERS. Residential identification (a street number) is required for each homesite in order to provide emergency service departments with specific locations per State ORS 401.720 and Deschutes County Ordinance 81-016, the latter ordinance carrying a \$500. maximum fine for non-compliance. With the exception of condominiums, cluster homes and non-residential facilities which have special requirements, all residences must have Deschutes County issued street numbers either on the building in such a position as to be plainly visible and legible from a distance of fifty feet (50') or on an approved post placed within a twenty foot (20') radius of the intersection of the closest street and the driveway of the residence and must face the street. Address signs and posts previously approved by the ARC will be allowed to remain so long as the proper numbers on the post are clearly visible from the street.

All numbers on posts must be of an approved size, either routed into the post or securely affixed thereto, and painted black. Posts themselves may be unpainted or stained to harmonize with natural wood tones of the residences stain colors. Street numbers placed on buildings shall contrast with their background and be of an approved size and color.

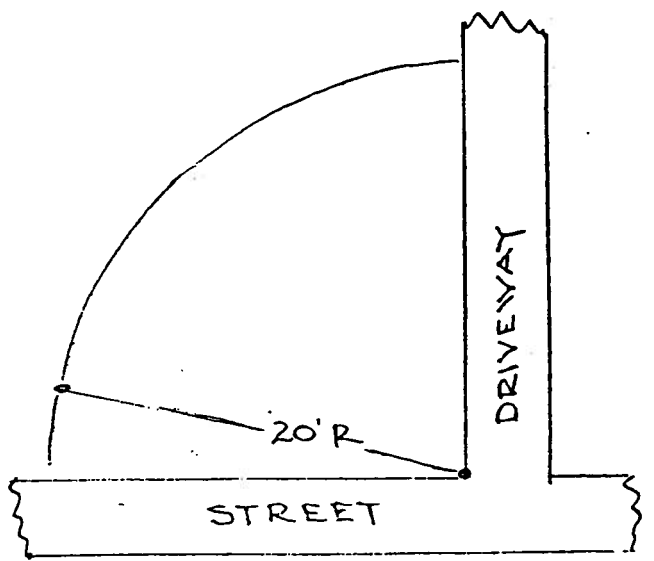

Drawings and specifications of approved markers (posts) are available from the ARC office. All other marker designs (except those previously approved) must be submitted to the ARC for approval, showing the proposed location and applicable submittal fee. No lighted signs shall be permitted.

LOT No.'s OPTIONAL
